

-**WB-CEDAR** Hard Red Winter Wheat

- Excellent Standability and Straw Strength
- Excellent Yield Potential
- Very Good Rust Resistance
- Early Maturity to Avoid Heat

CENTRAL REGION

WB-CEDAR is a Hard Red Winter wheat variety with excellent yield potential, as well as a good foliar disease package that includes very good resistance to Yellow (Stripe) Rust, Leaf Rust and Tan Spot. This variety appeals most to growers with high-production systems because of its strong straw with exceptional yield potential.

Seeds, Solutions, Success.

Ratings are 2013 Monsanto Wheat Breeding Research Data. Individual results may vary and performance may vary from location and from year to year. The result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

PVP-94, PVP Title V and/or US Patent have been granted or applied for on the featured and other WestBred brand varieties. For specific information and details please visit WestBredSeeds.com.
